8 EXPOSURE CONTROL/PERSONAL PROTECTION		
<ul> <li>Engineering Measures</li> <li>Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapour below the OEL, suitable respiratory protection must be worn.</li> </ul>		
Personal Protective Equipment :		
Respiration:Should ventilation be inadequate or if workers are exposed to concentrations above the exposure limit, appropriate certified respirators must be used.Eyes:Use safety eyewear designed to protect against splash of liquids. Never tough eyes with dirty hands or gloves.Ingestion:Observe the rules of hygiene. Wash hands and face before eating, drinking or smoking.Skin:Use protective gloves. Wash immediately in case of contact.
